Decorative Epoxy Coating

The SHIMICOAT Glitter Coating System is a spectacular decorative finish that is inspiring, vibrant in colour, hard-wearing and low maintenance. The finished surface is a creative choice with a smooth, glass like finish that has depth and a unique, bright sparkle.

Unique in style, design and pattern it will enable you to create your own bespoke floor that coordinates with the colour scheme in your home, showroom or entertainment venue.

Glitters are used in epoxy resin to create a unique surface coating with a bright sparkling depth, shimmering and iridescent accents and gleaming finish. The gloss can be regulated over a range of matte, semi to high gloss finishes. SHIMICOAT Glitter luster coatings are the latest technology where art and industrial applications merge to form bold, elegant and forward thinking. Ideally suited to bars, clubs, entertainment venues, retail environments and residential customers seeking longevity and a point of difference.

The ultimate choice for the glitz of a showroom floor and the durability of an industrial finish. The SHIMICOAT Glitter Finishing System can be incorporated into other flooring systems such as Flake Systems, Metallic Flooring Systems, Glow in Dark and many Art Works.

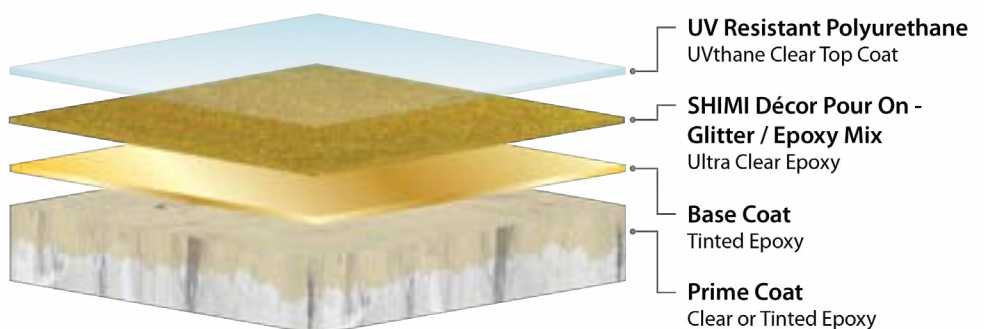

Manufactured by SHIMICOAT, the products are odourless, self-levelling, easy to apply and engineered to be ideally suited to Australian conditions.

Where to Install:

- Bars, Clubs and Entertainment Venues
- Office Environments
- Retail Stores
- Countertops and Artwork Surfaces
- Commercial Floors
- Residential Homes
- Hospitals and Care Facilities
