

## Description

EpoDil “Epoxy Diluent” is a blend of aromatic and aliphatic hydrocarbons and stabilizers designed to be used with the SHIMICOAT Epoxy range and Sealer products.

EpoDil Epoxy Diluent is engineered to produce excellent thinning and dispersion of the two pack epoxy resins and sealer materials.

The product significantly improves penetration and ease of application during the coating process as well as economically beneficiary by thinner coat application and more coverage.

SHIMICOAT EpoDil “Epoxy Diluent” can also be used in the clean-up process while applying Epoxy or Sealer.

## Features

- Easy pour and addition to Epoxy or Sealer.
- Multi-purpose applications, Epoxy Diluent, Sealer Thinner and ideal for clean up
- Slow down curing process of Epoxy and Drying time of sealers.
- Economical and increasing your coverage.
- Assist with better penetration of Epoxy and Sealer into the surface.
- Ideal for Indoor and Outdoor

## Uses

Epoxy Diluent and Thinner  
Concrete Sealer Diluent and Thinner  
Epoxy Coolant  
Exothermic Reaction Suppressant  
Cleaning Solvent
