

Description

SHIMICOAT Metallic Pearlescent Pigments (Liquid) For Special Effect Resurfacing Systems

SHIMICOAT Metallic Pearlescent Pigments are special effect pigments composed of mica nano-particles coated with various inorganic pigments to create metallic effects that mimic the natural look of stone and rock formations. These unique pigments are designed to be filed blended with our 100% solids clear Epoxy resins. When the metallic particles are mixed with epoxy, they give the coating a shine that reflects light and creates eye-catching dramatic effects.

Composition of SHIMICOAT Pearlescent Liquid Pigments

SHIMICOAT Pearlescent Liquid Pigments contain the following mineral and inorganic compounds at different ratios for various colours and effects:

- | | |
|---|--|
| 1. Mica "Potassium Aluminum Silicate (PAS)" | 3. Selenium Dioxide (SnO_2) |
| 2. Titanium Dioxide (TiO_2) | 4. Ferric Iron Oxide (Fe_2O_3) |

It contains 100% naturally occurring inorganic compounds.

Note: SHIMICOAT Pearlescent Pigment Liquids are specifically engineered for art/craft materials, surface coating and industrial applications.

The finished surface is a designer high gloss appearance with subtle reflective sparkle. Very unique and impossible to replicate two floors exactly the same. There are endless creative and stunning techniques and finish surface that you can call your own.

SHIMICOAT Pearlescent Liquid Pigments for ideal Translucent Effect.

Features

- | | |
|---|---|
| 1. 100% naturally occurring inorganic compounds. | 5. Required dosage of only 1%-2%. |
| 2. Widely used in epoxy, acrylic and many other resins. | 6. Rapidly disperses into your liquid system. |
| 3. Pearlescent pigments are also used in epoxy paint, art and craft, industrial coating applications. | 7. Easy roll, brush or pour-on application. |
| 4. Quality pearl pigments are easily dispersible into transparent paint. | 8. Great modern colour choices. |
| | 9. Provides a beautiful three-dimensional appearance |
| | 10. Unique in design offering the illusion of ripples, craters and swirl. |

Colour Chart

- | | | |
|-----------------|--------------------|---------------------|
| 1. Copper Cup | 8. Royal Blue | 15. Milky Marble |
| 2. Dragon Gold | 9. Coffee Club | 16. Metallic Yellow |
| 3. Flame Red | 10. Silver Frost | 17. Top Teal |
| 4. Forest Green | 11. Vibrant Purple | 18. Turquoise |
| 5. Grass Green | 12. Wild Orange | 19. Cobalt Aqua |
| 6. Lime Green | 13. Gun Metal | |
| 7. Pink Perfect | 14. Pearl White | |

Uses

- Epoxy Coating Applications
- Bars, clubs, retail stores
- Residential interior floors and showrooms
- Art and Craft
