SHIMICOAT
SURFACE SOLUTIONS

EPOXY OVER EXISTING BRICKS

SHIMICOAT provides both an industrial and commercial epoxy floor finishing system which is decorative, functional and ideally suited to apply over existing brick paving. The product adheres strongly to screed and well-prepared brick surfaces with minimal rise and change in floor height (1-3mm). It flows well into the gaps and grooves between bricks consolidating and holding them together.

The system can be used for Prior to Coat installations such as coving, screeding and other surface preparation procedures. Flexi Mortar Epoxy can be used to fill the cracks, grooves and existing joints. Epoxy Over Existing Bricks is available in many top surface finishing options such as:

Pre-Tinted Epoxy

Epoxy Flake Floors

Metallic Marble Finish

Slip Resistance Compliance

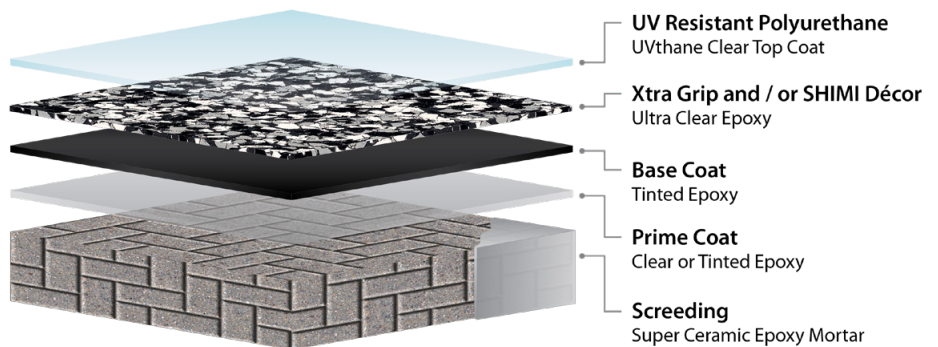

Manufactured by SHIMICOAT, the products are odourless, self-levelling, easy to apply and engineered to be ideally suited to Australian conditions.

Where to Install:

- Over Existing Bricks
- Residential Homes
- Garages and Workshops
- Office Floors
- Commercial Kitchens
- Food Processing Plants
- Industrial Warehouses
- Retail Environments
- Bars and Entertainment Venues
