# POLISHED CONCRETE

Polishing concrete is a multi-process concrete surface treatment involving:

1. Multi-stage metal bond grinding
2. Grouting, filling pinholes, cracks and grooves using GROUTEX
3. Surface densification and hardening using DENSILICATE
4. Multi-stage resin pad polishing
5. Ultra Clear Top Coat application to seal the finish surface.

The SHIMICOAT Polished Concrete procedure is carefully engineered to ensure a long lasting glass-finish polished surface. An ideal flooring system with industrial durability and a modern look, SHIMICOAT offers many sealers for various applications:

-  Solvent / Water Based Acrylic Sealer
-  UV Resistant Polyurethane "UVthane"
-  Ultra Clear Epoxy
-  Penetrating or Impregnating Sealers

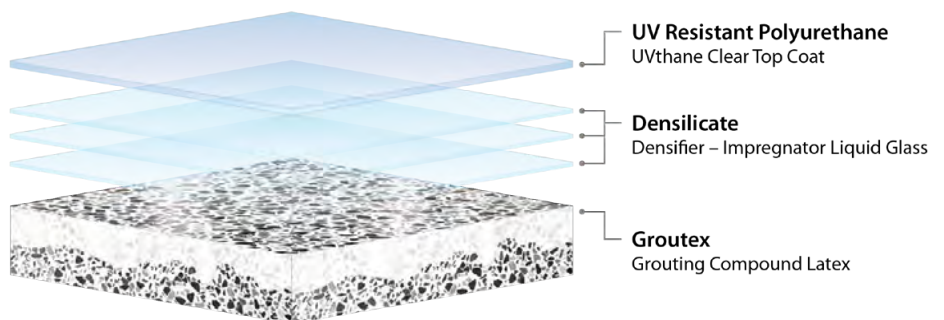

Manufactured by SHIMICOAT, the products are functional, easy to apply and engineered to be ideally suited to Australian conditions.

## Where to Apply:

- Residential and Commercial Floors
- Office Floors
- Shops and Retail Environments
- Bars and Entertainment Venues

## Features:

- Premium, Luxurious Finish
- Seamless and Easy to Clean
- Matte, Semi-Gloss and High-Gloss Sealers
- Long Lasting
- Mechanical Process
- Pet Friendly

**Multi-Stage Mechanical Grinding**  
Metal, Ceramic & Resin Bond
