QCell Patch & Repair

Complete Kit

Kit Sizes

Mini

Product Description	Size	Code	Quantity
QCell Filler Materials	2Lt	SC	1
Ultra-Clear Epoxy 100% Solid	750mL	UC	1

Small

Product Description	Size	Code	Quantity
QCell Filler Materials	5Lt	SC	1
Ultra-Clear Epoxy 100% Solid	1.5Lt	UC	1

Medium

Product Description	Size	Code	Quantity
QCell Filler Materials	10Lt	SC	1
Ultra-Clear Epoxy 100% Solid	3Lt	UC	1

Extra Large

Product Description	Size	Code	Quantity
QCell Filler Materials	20Lt	SC	1
Ultra-Clear Epoxy 100% Solid	6Lt	UC	1

Kit Includes

Commercial Grade QCell Patch & Repair contains:

- Order size QCell Filler Materials
- Order size Ultra Clear Epoxy 100% Solid

Kit Size	QCell *Filler Materials*	Ultra Clear Epoxy 100% Solid Kit Size (Lt)
Mini (2.75Lt)	2Lt	750mL
Small (6.5Lt)	5Lt	1.5Lt
Medium (13Lt))	10Lt	3L
Large (26Lt)	20Lt	6L

SHIMICOAT
SURFACE SOLUTIONS

Description

SHIMICOAT QCell Patch & Repair contains Ultra Clear Epoxy Resin (100% Solid) and QCell Filler materials to make paste epoxy mortar with your ideal consistency to perfectly patch and repair the surface. The products are available in three convenient kit sizes of small, medium and large.
Ideal Kit for installers and applicators requiring fast and effective surface repair prior to coating applications. Epoxy Mortar Concrete Repair Kit provides a high MPa finish surface stronger than 50 MPa concrete. SHIMICOAT QCell Patch & Repair is recommended where a large volume of surface preparation and concrete repair works is required. Easy to mix, Easy to apply and efficient.
QCell Filler used in QCell Patch & Repair assists in improving rheology, reduces sag/shrinkage, improves impact resistance and is chemically inert and non-absorbent. Modern, hygienic, functional and economical surface.

Usage

QCell shall be added to Premixed (Part A and Part B) Ultra Clear Epoxy, twice as much as resin quantity (200% by volume). Extra QCell can be added for special applications.

Applications

Use Trowel, Scraper or Spatula to smear over the cracked surface and fill the gap. Remove excessive and wipe off using scraper. Pour over the surface and squeegee to spread out and level.

Dry Time at 25°C

Pot Life:	45 minutes at 25°C
Tack Free:	2-3 hours
Thin Film Set:	8 Hours (Min, depending on temperature and humidity)
Deep Cast Set:	24 Hours (Min, depending on temperature and humidity)
Dry Cured:	12-16 hours – Foot Traffic (depending on temperature and humidity)
Fully Cured:	7 days (Vehicle Traffic)
Re-Coat:	Over night

Clean Up

EpoThin - Thinner & Diluent (Blend of Solvents).

Preparations

Clean and dry surface. Ensure surface to be coated is free of all dirt, grease, oil, paint, curing agents and other contaminants. Removal of Oil Contamination by degreaser and alkaline cleaning pressure wash
Acid-wash to enhanced surface porosity and etch the surface. Ensure moisture free surface. Allow to completely dry, run Dry Test. Place a piece of plastic over a small area, tape the edges and leave for 1 hour. Remove plastic, if there is no moisture on either surface, concrete is sufficiently dry. Ideally, always consider surface grinding and removal of loose materials. Grinding is always advisable prior to application of all Shimicoat Epoxy products, to maximize adhesion. For further information, please refer to SHIMICOAT Instruction for “Surface Preparations”.

Description

SHIMICOAT QCell Patch & Repair contains Ultra Clear Epoxy Resin (100% Solid) and QCell Filler materials to make paste epoxy mortar with your ideal consistency to perfectly patch and repair the surface. The products are available in three convenient kit sizes of small, medium and large. Ideal Kit for installers and applicators requiring fast and effective surface repair prior to coating applications. Epoxy Mortar Concrete Repair Kit provides a high MPa finish surface stronger than 50 MPa concrete. SHIMICOAT QCell Patch & Repair is recommended where a large volume of surface preparation and concrete repair works is required. Easy to mix, Easy to apply and efficient.
QCell Filler used in QCell Patch & Repair assists in improving rheology, reduces sag/shrinkage, improves impact resistance and is chemically inert and non-absorbent.

Kit Size	Kit Contains
Mini Kit	2Lt (0.8Kg) QCell Filler Materials with 750mL of Ultra Clear Epoxy 100% Solid.
Small Kit	5Lt (2Kg) QCell Filler Materials with 1.5Lt of Ultra Clear Epoxy 100% Solid.
Medium Kit	10Lt (4Kg) QCell Filler Materials with 3Lt of Ultra Clear Epoxy 100% Solid.
Large Kit	20Lt (8Kg) QCell Filler Materials with 6Lt of Ultra Clear Epoxy 100% Solid.

Modern, hygienic, functional and economical surface.

Features

QCell Patch & Repair Kit comprises of Clear Resin 100% Solid and reinforcing body structure of QCell Filler materials to provide the hardest surface in Civil Construction industries. Selected Features of SHIMICOAT QCell Patch & Repair:

- Contains highly advanced QCell Filler Materials
- Maximum reinforcement Epoxy structure
- Light and Easy to mix, use and apply
- High compressive strength
- Thermal stability
- Longevity over 20 years
- Ideal Rheology for all applications
- No Sagging as it is light
- Improved Fire Rating performance
- Modern, Hygiene, Functional and Economical.
- Highly resistant to chemical attack and pedestrian or vehicular traffic.
- DIY Friendly, easy to apply and curable over a wide range of temperature.

Specifications

Physical & Chemical properties of QCell Patch & Repair:

Pot Life @25°C	45min
Colour of Blend	Resin is Ultra Clear and transparent Blended with QCell is Light Grey (QCell Colour)
Consistency and Flow	Addition of QCell improves consistency “Easy to apply paste”
Touch Dry	*4 Hours*
Initial Cure Time	*8-20hours (depending on temperature)*
Ultimate Cure Time (Days)	7 Days
MPa of Epoxy Mortar	>50
Maximum Temperature Exposure (°C)	140

Ph: (08) 9364 7446 | info@shimi.com.au | ABN: 28 622 871 283 | **www.shimi.com.au**

Specific resistance properties of QCell Patch & Repair in harsh chemicals:

Media	Reagent	Rating
Acids	Hydrochloric Acid	B
	Sulphuric Acid	C
	Acetic Acid	B
	Nitric Acid (10% max)	C
	Phosphoric Acid (25% max)	B
Alkalis	Sodium Hydroxide	B
	Ammonium Hydroxide	A
	Potassium Hydroxide	B
	Sodium Hypochlorite (Bleach)	A
Solvents	Xylene	A
	Methyl Ethyl Ketone (MEK)	C
	Diesel	A
	Ethanol	A
	Acetone	B
	Kerosene	A
	Petrol	A
	Wine & Beer	A

Code	Resistance	Description
A	Excellent	Suitable for Long term immersion
B	Good	Suitable for Short-term immersion (Max 3 days)
C	Caution	Very short contact time is OK, spill and splash
D	Danger	Not Recommended
Indicative reference only. Tested in laboratory conditions at 25°C.		

Resistance properties of QCell Patch & Repair

Heat Resistant	140°C	**Alkalis**	Resist Short term immersion in all alkalis.
Weather Proofing	All Epoxy Coatings may yellow with time. Weatherproof top coat may be used if required.	**Salts & Brines**	Resist continuous or long-term immersion in all Salts & Brine systems.
Solvents	Resistant to most hydrocarbon solvents and alcohols.	**Water**	Excellent resist to continuous or long term immersion in fresh & Salt Water.
Acids	Resist splash and spills in all acids.	**Abrasion**	Excellent when fully cured (7 Days)

Direction

Mix Twice as much as resin quantity used (200% by volume)
For example, if using Ultra Clear Epoxy, add 1.0Lt of Part B (Curing Agent) into 2.0Lt of Part A (Resin), mix for 2-3minutes and add 6.0Lt (2.4Kg) of QCell Filler. If necessary, add EpoSeal Diluent at a rate of up to 5% to smoothen the paste.

Mixing:

Mix thoroughly for a minimum 3 minutes manual or with mechanical mixer at low speed (750rmp Max) to ensure uniformity of the product.

Helpful Hints:

- Ensure surface to be coated is dry. Moisture can cause blooming and delamination.
- Pot life is approximately 45 minutes, work within 30min to ensure ideal rheological properties and easy flow application.
- Use steady long strokes and avoid overworking the roller or pushing your roller too quickly as this may trap air bubbles in the coating.
- Do not apply, if the rain is expected within 24 hours of application.
- Not recommended for use below 10°C or above 35°C.
- New concrete should be allowed to cure fully (at least 20days) before application.
- Keep the containers (Pail or Cans) sealed when not in use.
- Avoid application on hot surface.

Drying Times

SHIMICOAT QCell Patch & Repair dries in 8-20 hours. High temperatures and windy conditions may speed up the curing time.

Keep foot traffic off for, at least 16 hours and vehicles for at least 7 days. Full hardness is achieved after 7 days.

Temp °C	Pot Life (min)	Surface Dry (Hours)	Initial Cure (Hours)	Recoat Time (Hours)	Fully Cured (Days)
10°C	45	12	24	24	7 Days
20°C	40	10	18	18	7 Days
30°C	35	8	16	16	7 Days

WARNING

- Heavy vehicles with hot tires may cause damage on driveway. Avoid driving over the newly repaired floors till completely cured (7 Days).
- Do not apply QCell Patch & Repair, if the concrete has a patchy appearance as moisture may be present. Dry Test prior to application, commence application when fully dry and moisture free.

Storage

The products shall be stored out of direct sunlight and heat at all times. The shelf life of the product is 24 months, mix uniformly for 3 minutes prior to use.
